

Anguilla - The Pipe

Caribbean · surveyed 2026-03-02

© coralreefdiagnostics.com

Coral Health Index: TBD

What was done. No diver transect was run at this site. The figure is a blind Claude computer-vision point classification of 65 photographs by the author, read without sight of any other method's result; other computer-vision methods are compared on the site page. The written account of the site is a review of its photographs, not a second survey.

HARD CORAL COVER
6.6%

POSITION
18.2243, -63.0712
Approximate position: no GPS fix was logged for this dive.

The Pipe is a colonized concrete conduit turned reef, its length studded with boulder and brain corals, encrusting and tube sponges, a giant anemone, and a grazing queen conch. A blind Claude computer-vision point count puts coral cover around 6.6%.
