

Chagos Archipelago - Great Chagos Bank West (BITB40)

Middle Brother · surveyed 2015-03-21

Coral Health Index: TBD

What was done. Coral cover here was measured on in-situ benthic transects run by divers on the [Living Oceans Foundation Global Reef Expedition](#) — a diver measurement, not an estimate read off photographs. The written account of the site is a review of its photographs, not a second survey.

A lagoon-channel reef off Middle Brother with 45% coral cover and 33 coral genera, where *Acropora* thins sharply with depth and bare rock takes its place. Sea fans, wire corals, and two gray reef sharks were photographed, and no bleaching was found. Surveyed on the [Living Oceans Foundation's Global Reef Expedition](#).
