POSITION

**-8.5200, 119.6650**

One of the best dives of Anderson's Komodo trip: a near-vertical wall to 30 m with overhangs and coral-encrusted boulders, rising through a low-relief terrace of 10-15 encrusting coral species to a very diverse, high-cover shallow zone. Visibility was among the best of the trip, and snapper, batfish, and angelfish were seen.

**Bahasa Indonesia.** Salah satu penyelaman terbaik dalam perjalanan Anderson di Komodo: dinding nyaris tegak lurus hingga 30 m dengan ceruk-ceruk menggantung dan bongkahan batu berselimut karang, naik melalui teras berelief rendah dengan 10-15 jenis karang mengerak menuju zona dangkal yang sangat beragam dan bertutupan tinggi. Jarak pandang termasuk yang terbaik sepanjang perjalanan, dan terlihat ikan kakap, ikan kelelawar, serta ikan angelfish. *Terjemahan ringkasan ini oleh AI; versi bahasa Inggris yang berlaku.*
