POSITION

-8.5600, 119.7000

Komodo's dedicated night-dive and critter site, visited four times in six days, where the sand turned up flying gurnards, iridescent and tiny crinoid-dwelling cuttlefish, ornate ghost pipefish, bobtail squid, a possibly new octopus, and crabs living on fire urchins. Coral is a backdrop here rather than the draw, with beautiful soft corals on the slope.

Bahasa Indonesia. Lokasi khusus penyelaman malam dan pencarian biota kecil di Komodo, dikunjungi empat kali dalam enam hari, tempat hamparan pasirnya memunculkan ikan kepala batu terbang, sotong kecil berwarna warni yang hidup di antara lili laut, ikan pipa hantu berhias, cumi bobtail, seekor gurita yang mungkin jenis baru, serta kepiting yang hidup pada bulu babi api. Karang di sini menjadi latar belakang, bukan daya tarik utama, dengan karang lunak yang indah di lerengnya. *Terjemahan ringkasan ini oleh AI; versi bahasa Inggris yang berlaku.*

Photographs: Anderson Mayfield/Coral Reef Diagnostics — 3 of 47 on file; watermarked · Full site record: <https://api.coralreefdiagnostics.com/site-pages/indonesia-komodo-np-wainilu.html> · Heat stress is the mean of the latest five annual maxima of NOAA Coral Reef Watch degree-heating weeks for this reef's NOAA CRW virtual station (East Nusa Tenggara) — a five-year heat history for the station's waters, not a measurement at this site on the dive date.
